

AUTHENTREND

The Most Compatible Security Key

Fingerprint Authentication

USB, NFC, and MIFARE

Combine all the most common access interfaces for a truly universal key.

FIDO, Biometrics, and PKI

Multiple access credentials on a single badge, protected by fingerprint verification.

Passwordless and PINless

ATKey.Badge doesn't require remembering any code, touch the card and login.

ATKey.Badge combines an ATKey.Card and its holder to enhance the card compatibility and UX.

The passwordless experience that a complex environment needs. Use the same credentials to login independently from the available interfaces. No duplicate accounts no, single use keys. One key for all your doors.

Cross Device & Platform

One Key, Any Device. ATKey.Badge lets users log in securely across multiple devices and platforms. Perfect for shared workstations: a touch, and you're in.

Windows MFA

ATKey.Login enhances safety and convenience of the login on Windows PCs and is compatible with a wide range of environments.

ATKey Provisioning

With the ATKey provisioning solutions, admins can pre-register ATKeys for users' accounts, making the user onboarding process frictionless.

Web APP Authentication
